Coach Hilawe Core Principle

Transformation is built by consistency, not perfection. Follow the structure, use the approved swaps when needed, and judge progress across time rather than one meal.

Prepared exclusively for Yohannes. Unauthorized redistribution or resale is strictly prohibited.

SECTION 02

HOW TO USE YOUR PLAN

This nutrition system is engineered to seamlessly integrate into your daily life. Adhere to these three operational principles.

01

Follow the day's structure

Use the listed meals and portions as your daily foundation.

02

Use a swap when needed

Approved exchanges give you flexibility without turning the plan into guesswork.

03

Consistency beats perfection

Follow the structure most of the time and use the plan as a repeatable system.

Weekly Preparation Checklist

1. Batch-cook staple stews (Shiro, Misir, Chicken) in advance for 2-3 days.
2. Boil eggs in advance for zero-friction morning prep.
3. Wash and portion fresh vegetables to prevent daily cooking friction.

COACH HILAWE

Prepared exclusively for Yohannes. Unauthorized redistribution or resale is strictly prohibited.

SECTION 03

YOUR PLAN MAP

7 days = one personalized core week. 14/30-day products use the same reviewed core with the approved rotation and swaps shown above.

Week	Rotation Structure
Week 1	Primary structure

Multi-Week Progression Roadmap

Week 01

Phase 1

Foundation

- Establish meal timing consistency and hydration baseline.
- Calibrate precise portioning using familiar household measures.

Rotation Strategy

The purpose of structured rotation is dietary variety without macro variance. Once the primary week is mastered, swap rotations provide flavor diversity while keeping metabolic targets identical.

Shopping & Storage Pro Tips

- Purchase produce twice weekly to retain maximum micronutrient potency.
- Store dry legumes in airtight glass jars away from humidity.
- Keep eggs refrigerated at consistent temperatures for freshness.

Prepared exclusively for Yohannes. Unauthorized redistribution or resale is strictly prohibited.

SECTION 06

PORTION & HYDRATION GUIDE

Hydration is the metabolic cornerstone for lipolysis and muscular energy. Maintain consistent fluid intake across all waking hours.

TARGET DAILY HYDRATION

3.5 L / day

14 medium glasses — 250 ml each

Measurement Principles

Every meal shows exact grams together with a familiar household portion where the source dataset supports one.

- **Palm:** Standard measure for meat/poultry portioning.
- **Cup:** Standard measure for cooked grains and legumes.
- **Rolled Injera:** 1 medium rolled piece represents ~120 grams.

Coach Hilawe Final Note

Transformation is built by consistency, not perfection. Follow the structure, use the approved swaps when needed, and judge progress across time rather than one meal or one day.
